Win Metasploit Express Worth \$3000!!

OK... so you've seen the great videos by Ryan Linn, the webcast by James "Egyp7" Lee and the numerous forum discussions. Now it's time to get your very own copy of Metasploit Express that includes the full license & support for 1 year. And for your viewing pleasure, be sure to check our Metasploit's newly redesigned website. For those not in the know or unfamiliar with the Express Edition:

Metasploit Express builds on the power of the Metasploit Framework, the gold standard for penetration testing with more than one million unique downloads in the past year and the largest public database of quality assured exploits. Unlike the Metasploit Framework, which offers only a command-line interface, Metasploit Express provides an easy-to-use graphical user interface that guides the user through the steps of discovery, gaining access, taking control, and collecting evidence. In addition to the features available in the Metasploit Framework, Metasploit Express automates many common penetration testing tasks and provides the ability to launch advanced attacks without the need to develop custom scripts. Individuals whose role does not permit them to conduct penetration tests can still verify exploitability with a dry run that only shows the exploit information but does not execute the exploits.

Sounds like a great deal? All you have to do is participate on EH-Net. It's not easy getting all of these monthly prizes for EH-Net members, but the knowledge you provide the security community is priceless. And the more knowledge you provide, the greater your chances of winning the thousand of dollars of prizes EH-Net gives away each and every month. So get at it!!
