
July 2011 Free Giveaway Winners - Securit

We Have Winners!

Wayne Burke, pen tester, instructor and CSO of Securit CSi along with the cooperation of EC-Council CAST, has put together the largest prize yet to be offered to EH-Net's top contributors for our Free Monthly Giveaways. Not only has he offered up a seat in Securit's 3-day security course, Digital Mobile Forensics Deep Dive, but also seats in 2 other 3-day courses being offered during the 4-day CAST Summit in Bethesda, MD from August 22 - 24.

"Digital Mobile Forensics Deep Dive: This three-day highly advanced and technical course provides students with the knowledge and real world hands-on practical skills for performing Mobile Forensic Investigations. The course is based on vendor neutral Digital Forensic principals, with focus on Apple OS, Google Android, RIM Blackberry and an array of other mobile devices and operating systems.

Attendees get to choose from a suite of workshops which are highly technical and advanced, covering current and important security topics such as penetration testing (Joe McCray), mobile forensics (Wayne Burke), cryptography (Chuck Statton), network defense (Kevin Cardwell), and application security (Tim Pierson). The event concludes with a one-day security training seminar that will have a few mini-lectures, and allows for participants to actually learn, and not just listen or be rushed through a short presentation like how it's like in many other events or conference."

The 3 winners this month are H1t M0nk3y, mubix and vijay2. Congrats and be sure to report back on the courses, workshops and the event as a whole. Thanks to all.
